New Applications, Global Advancements Showcased at AWWA Membrane Technology Conference *Registration Deadline Extended to February 27*

(DENVER, CO) – The American Water Works Association will host the 10th biennial Membrane Technology Conference in Memphis, Tenn., at the Memphis Cook Convention Center, March 15-18. The conference will offer specialized workshops and an extensive technical program highlighting the latest innovations and uses of membrane technology in water treatment from around the world.

International case studies will include Australia's Western Corridor Recycled Water Project and applications of ceramic membrane microfiltration for drinking water production in Japan.

Additionally, the Membrane Research Session, to be held March 17 at 8:00a.m., will feature current research activities at universities around the United States and overseas.

The registration deadline for the conference is February 27. For more information or to register for the Membrane Technology Conference, go to <http://www.awwa.org/Conferences/membrane>.

###

AWWA is the authoritative resource for knowledge, information, and advocacy to improve the quality and supply of water in North America and beyond. AWWA is the largest organization of water professionals in the world. AWWA advances public health, safety and welfare by uniting the efforts of the full spectrum of the entire water community. Through our collective strength we become better stewards of water for the greatest good of the people and the environment.
