AWWA webcast – High Technology Tools for Operators

(DENVER, CO) – On March 11 AWWA will host a High Technology Tools for Operators webcast. High-tech solutions were once implemented by only the largest water utilities. Today, many medium and small-sized utilities are realizing the benefits of implementing technology for process monitoring and control, equipment condition monitoring, asset management, document management, remote access to information, and many other applications across their organization. This webcast examines how several high-tech solutions have been implemented successfully and divulges the keys to their success.

Webcast presenters include:

- Uzair Shamsi, PhD, PE, GISP, Technical Manager, Michael Baker Jr., Inc.
- Elisabetta DeGironimo, Watershed and GIS Coordinator, Mohawk Valley Water Authority
- Thomas DeLaura, PE President, Westin Engineering of Michigan, PLLC
- Tom Walski, PhD, PE, DAWRE, Senior Product Manager, Bentley Systems

For more information on seminars and registration details, go to www.awwa.org/Education/webcasts.

###

AWWA is the authoritative resource for knowledge, information, and advocacy to improve the quality and supply of water in North America and beyond. AWWA is the largest organization of water professionals in the world. AWWA advances public health, safety and welfare by uniting the efforts of the full spectrum of the entire water community. Through our collective strength we become better stewards of water for the greatest good of the people and the environment.
